

## MecMast accessories

**THE LEVELLING SYSTEM** is a manually operated device specially designed for vehicle mounted masts. Its purpose is to adjust the mast inclination when the vehicle is on a slope, in order to grant to the equipment mounted on the mast top a horizontal working condition.

It is composed by a lower regulating support bracket, equipped with two manual adjusting handles and an upper holding bracket equipped with an oscillating ring.

Besides the different remote controls, the MecMast can be equipped with various accessories. For example: guying set (including guying collars, ropes, pickets and carrying bag), Nycoil cable conduits, Nycoil baskets, protection

bellows against dust and sand in different colours, ice spacers for using the mast at low temperatures, anti-freeze liquid for preventing the creation of ice layers on the tubes and for melting it, etc.

**ELECTRONIC BOX WITH CONNECTORS**

The Mecmast box is available in different versions with a wide range of military connectors.

**NYCOIL**

The Nycoil is made from flexible nylon and is resistant to many chemicals and petroleum based products making its use on vehicles safe and reliable.

**NYCOIL BASKET**

Basket for the storing of an external Nycoil cable conduit.

**ICE SPACERS**

Against compressed ice and snow between the collars.

**ANEMOMETER**

The anemometer is extremely accurate, has a low starting torque, a particularly robust design and is very durable.

**PROTECTION BELLOW**

Protection against dust and sand, available in different colours.
